

Loading Data into the Kscope Vote Review App

Data Load Source

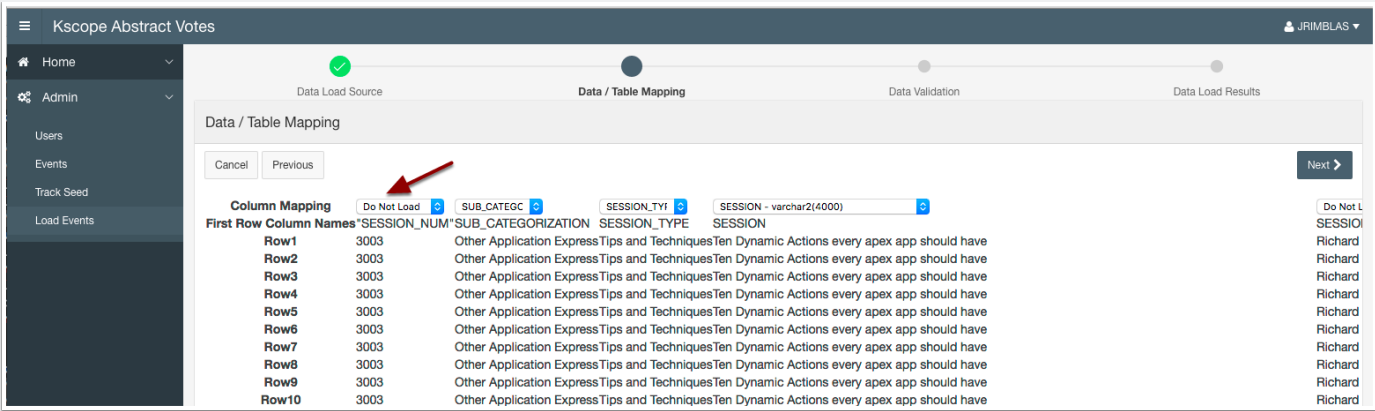

Download your votes file report from ODTUG and upload it into a track.

Data / Table Mapping

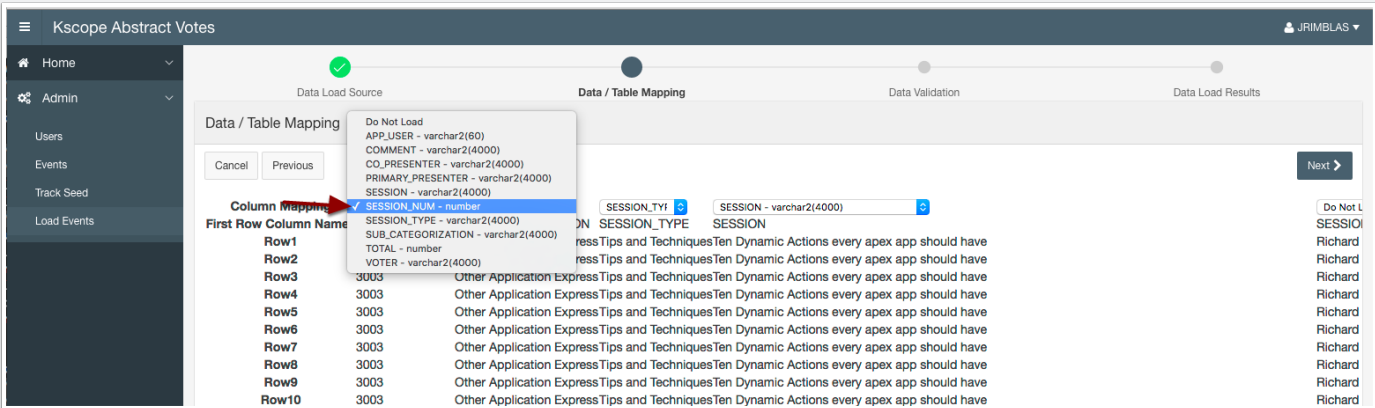

There are two columns that you need to map manually: Session Num and Co-Presenter

Map the "SESSION_NUM" column

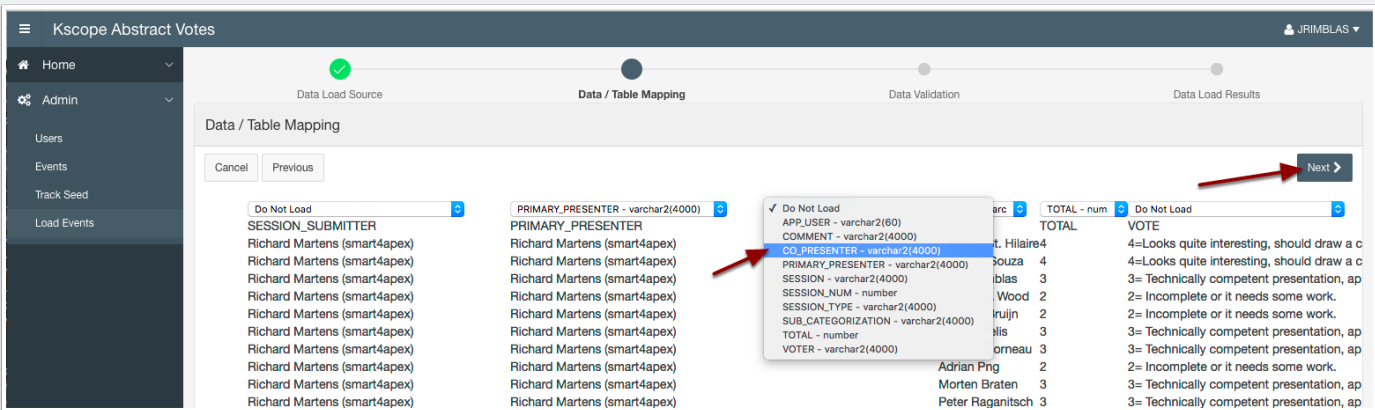

Loading Data into the Kscope Vote Review App

Map Session Num

Map CO-Presenter

Scroll to the right and map the "Co Presenter" column. Click next.

Loading Data into the Kscope Vote Review App

Data Validation

Validate your data seems correct. Click "Load Sessions". This will load the session and votes.
